CJR

CABLE JACKET REPAIR

A durable, easy-to-use solution to repair cable jacket damage

Polywater CJR repairs damaged communication cable jackets, protecting the network from costly outages. CJR adds a new layer of protection to the affected area, preventing further wear and water ingress. A unique syringe package allows for simple toolless application. This two-part sealant cures in most environments and is intended for both aerial and underground applications.
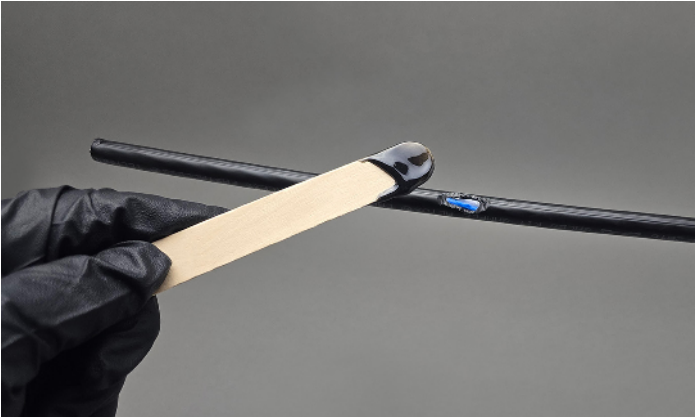

FEATURES AND BENEFITS

- **QUICK & EASY INSTALLATION**
  Syringe package requires no specialty tool; installs in seconds

- **COMPATIBLE**
  Adheres to and repairs all common communication cable jackets

- **MULTI-USE**
  Each package can perform multiple repairs

- **PROTECTION**
  Seals damaged jackets, providing a waterproof barrier

- **FLEXIBLE**
  Allows for cable movement without peeling or cracking
